MX-E650 Mini System

FEATURES

CD player

Bluetooth®: An ideal way to connect devices wirelessly. The Samsung Audio System is equipped with Bluetooth, so you can sync up quickly and easily to compatible devices – including smartphones and media players.

17 preset EQ modes

EZ MP3 Maker (CD4x, MIC, Radio, Aux): Enjoy fast and flexible MP3 creation from a variety of sound sources. The built-in EZ MP3 Maker lets you use your audio system to make high-quality MP3 files via CD ripping or recording from FM radio and auxiliary input signals. You can even connect a turntable and transfer your vinyl records – so virtually any music collection can be digitized.

Giga Sound Blast: Upgrade your sound system to Samsung's Giga Sound Blast, and experience superior performance and outstanding sound quality. The enhanced low-frequency bass and crystal-clear treble make it the life of the party.

Radio Recording Feature: Lets you catch all of your favorite radio programs. It's simple: just set the start and stop times, and your Samsung Audio System automatically captures the audio recording for you to enjoy at your leisure.

Mini Component: Thanks to the Samsung Mini Component, you'll never be without music. The USB CD Auto Change function automatically switches between your USB and CD when the music stops on either one. It's like having a continuous soundtrack!

Stadium EQ: The perfect way to add the power and depth of sporting events to your listening experience. Now you can hear the big game over the radio, and feel like you're right there in the action.

CD Ripping: Lets you take your favorite tracks with you on your MP3 player. In just minutes, you can convert your CDs to MP3s – simply insert your CD and press the 'rip' button.
